

Sustainable Packaging Made of PE Mono-Material

Recyclable packaging is becoming more and more an important part of the packaging market. Stricter legal requirements as well as an increasing demand from filling companies require the conversion to mono-material packaging. To meet these requirements, we have developed 4 new products made of PE mono-material.

PE Monomaterial Stand Up Pouch with Spout

FEATURES	
Material: Monomaterial OPE/PE (transparent)	✓
Material thickness: 25/90 µm	✓
