

## Our double-compartment system - versatile and convenient

Thanks to the novel double-compartment system and the transparent barrier, two different products can be tightly packaged in one pouch. The new packaging, consisting of an aluminium-free POLIVEL® laminate, has starter notches as an easy-opening feature.

Whether on the go, at home, or in the office, the double-compartment system provides added value in comparison with conventional packaging. Many different applications are imaginable, such as a gardener's spring set with soil and flower

seeds, an infant's travel kit with diapers, moist wipes, and sanitary bags or a birthday set with a cake mix and candles. The range of ideas is virtually unlimited.

We would be happy to advise you personally and develop the best possible solution for your application. Contact us!

### Product overview

#### Material

POLIVEL® Laminates without aluminium barrier layer  
 POLIVEL® met Laminates with a metallized barrier layer film  
 POLIALUVEL® Laminates with aluminium barrier layer
